Dear Public Service Commission,

Duke should quit investing in dirty, old energy like coal and nuclear, and actually invest in the cheaper renewable technologies its executives claim to support. I want the Carolinas to be more energy efficient and powered by local wind & solar that will employ thousands of Carolinians. This will not only help the Carolinas in preventing more contaminated air but also serve as an inspiration to other 'dirty energy' power plants around the country and world.

Sincerely,

Dianne WILLIAMS
